Sreepadmam, Maruthady Kollam

OBJECTIVE

Enthusiastic professional aiming to grow as an AI Engineer by leveraging my experience in data processing and model training workflows.

Seeking opportunities to enhance my technical skills in model development, deployment, and AI solution design while contributing to impactful real-world innovations.

SKILLS

Python	Deep Learning	Excel
Data Analysis	Natural Language Processing	Power BI
Machine Learning	Image Processing	SQL

PROFESSIONAL EXPERIENCE

AI- DATA ANALYST

Feb 2025 - Present

Way.com India Pvt Ltd, Thiruvananthapuram

- Managing end-to-end data processes for AI model development, including data collection, cleaning, and annotation.
- Ensuring data quality and structure for efficient model training and performance improvement.
- Collaborating with the team to prepare and analyze datasets for predictive modeling and automation tasks.

PROJECTS

Crowd Counting Detection Model

Developed an AI-powered Crowd Counting application using YOLO (Ultralytics) and Streamlit to detect and count people in images and videos. The system allows users to upload images or videos through an interactive web interface and displays real-time person detection with bounding boxes and accurate crowd counts. Implemented efficient model inference, session management, and reset functionality for repeated analysis. The project demonstrates practical skills in Computer Vision, Deep Learning, Python, YOLO object detection, and UI deployment using Streamlit.

EDUCATION & CERTIFICATIONS

PG DIPLOMA IN DATA SCIENCE & AI

Edure Learning Pvt Ltd, Thiruvananthapuram

2023-2024

B.com Commerce with Computer Application

IIHRD College of Applied Science Kundara Kollam

University of Kerala

2020-2023
